

RSU23 NEW STUDENT REGISTRATION

RSU 23 school district utilizes an online student registration and student data validation system for all new and returning student registrations. The system is a secure and “green” process, which allows the district to quickly obtain up to date information on your child. The online system will be used for all new and returning student registrations for student demographic, emergency and medical information and allow you to update that information prior to the start of the new school year. The system will also allow you to electronically sign the annual permission forms for school district policies such as the Technology Use Policy and School Handbooks. This online process replaces most of the hard copy student registration and permission forms used in previous years.

You will need to create an account. Please [click here](#) to begin the registration process for your student, and create your account.

When completing the online form, please note that fields marked with a red asterisk are required fields and data must be entered. You will be able to save your information and return at a later time for submission if necessary. Your child’s registration will not be considered complete until the on-line registration form is submitted and other required forms are received by the school.

Parents or legal guardians of students new to the RSU 23 District are asked to make an appointment during regular school hours with the Administrative Assistant of the school where the student will attend.

You will need to provide the following documentation at this appointment:

1. Two forms of proof of residency are required for registration. These include: Maine driver’s license; utility receipt; dated real estate tax bill; dated rental/lease agreement; dated excise tax receipt; or utility bill within the last 30 days.
2. To be enrolled in Kindergarten, your child must be five (5) years of age on or before October 15th. You must provide original birth certificate and provide immunization records.
